DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: (A0,1,2), A(3,4), (A5,6), (A7,8), 14A, 14B, 14C and 14D in Fig. 1; 21, 23, 28, 29, 210, 216, 217, 218, 219, 220, 221, 222, 223, 224, 227, 228, 229, EQL, EQR, TGLb, SLPG, SLP and SLN in Figs. 3 and 6; (A0,1,2), 14A, 15A, A(3,4), (A5,6), (A7,8), 14A, 14B, 14C and 14D in Fig. 5. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: memory cell blocks 19 (line 6, page 4). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should

include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features as recited in claims 1-18 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is not understood what the (A0,1,2), A(3,4), (A5,6), (A7,8), 14A, 14B, 14C and 14D in Fig. 1; 21, 23, 28, 29, 210, 216, 217, 218, 219, 220, 221, 222, 223, 224, 227, 228, 229, EQL, EQR, TGLb, SLPg, SLP and SLN in Figs. 3 and 6; (A0,1,2), 14A, 15A, A(3,4), (A5,6), (A7,8), 14A, 14B, 14C and 14D in Fig. 5 really are since they are not described in the specification.

It is not understood what the memory cell blocks 19 (line 6, page 4) really are since they are not shown in the drawings of the present invention.

All the features as recited in claims 1-18 are not readable on the drawings of the present invention as well as in the specification. Applicant is requested to particularly point out each of elements recited in the claims to be read on the respective elements

as shown in the drawings of the present invention as well as in the specification in order to help the examiner to understand the subject matter of the claimed invention.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 19 is, insofar as understood, rejected under 35 U.S.C. 102(b) as being anticipated by Kwon et al., 5,973,972.

Kwon et al., 5,973,972, discloses in Fig. 1 a memory device comprising:

Sense amplifier 60;

Bit lines BL and /BL;

transmission gates TG1 and TG2 each comprising a P-channel transistor and an N-channel transistor being controlled by complementary column selection signals Y and /Y which are inherently complementary gate voltages.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
